

GAME CHANGING CARBON MARKET INTEL

The global carbon market is a developing and rapidly changing space. Whether you are on the supply or demand side of the market, to be successful you need up to date and accurate intelligence.

This dynamic market is undergoing a major shakeup of supply and demand due to government investment and rapidly increasing participant numbers. It can be hard to know what action to take and how to manage some of the inherent risks in this environment.

Market Advisory Group's Carbon Monthly keeps you up to date on the latest domestic and international carbon market movements and is designed to provide your business with clear, actionable insights.

We want our clients to have the competitive edge they need to understand this emerging area of the economy.

WHO IS
MAG?

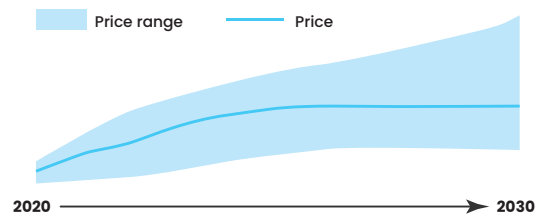

The Market Advisory Group are independent expert advisors to participants in Australia's emerging carbon market and the renewable energy sector.

Founded on transparency and independence, we seek to provide the most authentic and dependable expert advice to anyone who needs it, being courageous and innovative in all aspects of our work.

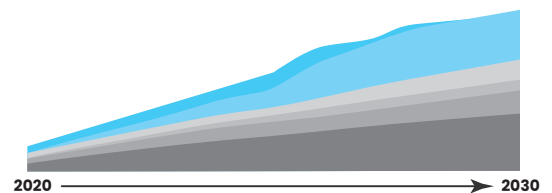

Our team is a network of Australia's carbon industry experts, with expertise in renewable energy, electricity, gas and carbon markets.

Each month of your Carbon Monthly subscription, you will receive:

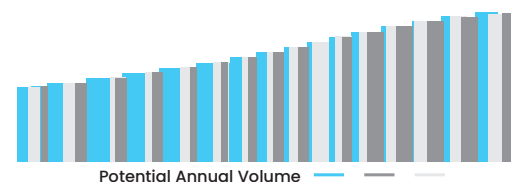

1 Updated Australian carbon credit units (ACCU) long-run marginal cost price forecast.
Incorporating best market supply and demand predictions.

2 Robust demand forecast broken down by sector.

3 Access to best in industry up to date view of the long-run cost of abatement and potential volume by method type.

As well as:

- 4 ACCU spot price updates and commentary on volume, volatility, trends and the impact on procurement strategies.
- 5 Updates on global emissions markets and compliance forecasts.
- 6 Analysis and commentary on price and volume movements in Climate Active compliant international units.
- 7 Domestic policy updates and the potential impacts on the carbon market.
- 8 A 'deep dive', where we take an in-depth look at the good, bad and the ugly issues impacting the market like large-scale generation certificate fungibility, ACCU demand scenarios, and implications of financial damage provisions associated with not delivering against Emissions Reduction Fund contracts.

PLUS our subscribers also get:

An exclusive briefing from one of our analysts every month of your subscription.
